

Instruction to upload pre-Wedding photos

1. Download and Install the FTP software for free:

<http://cyberduck.io>

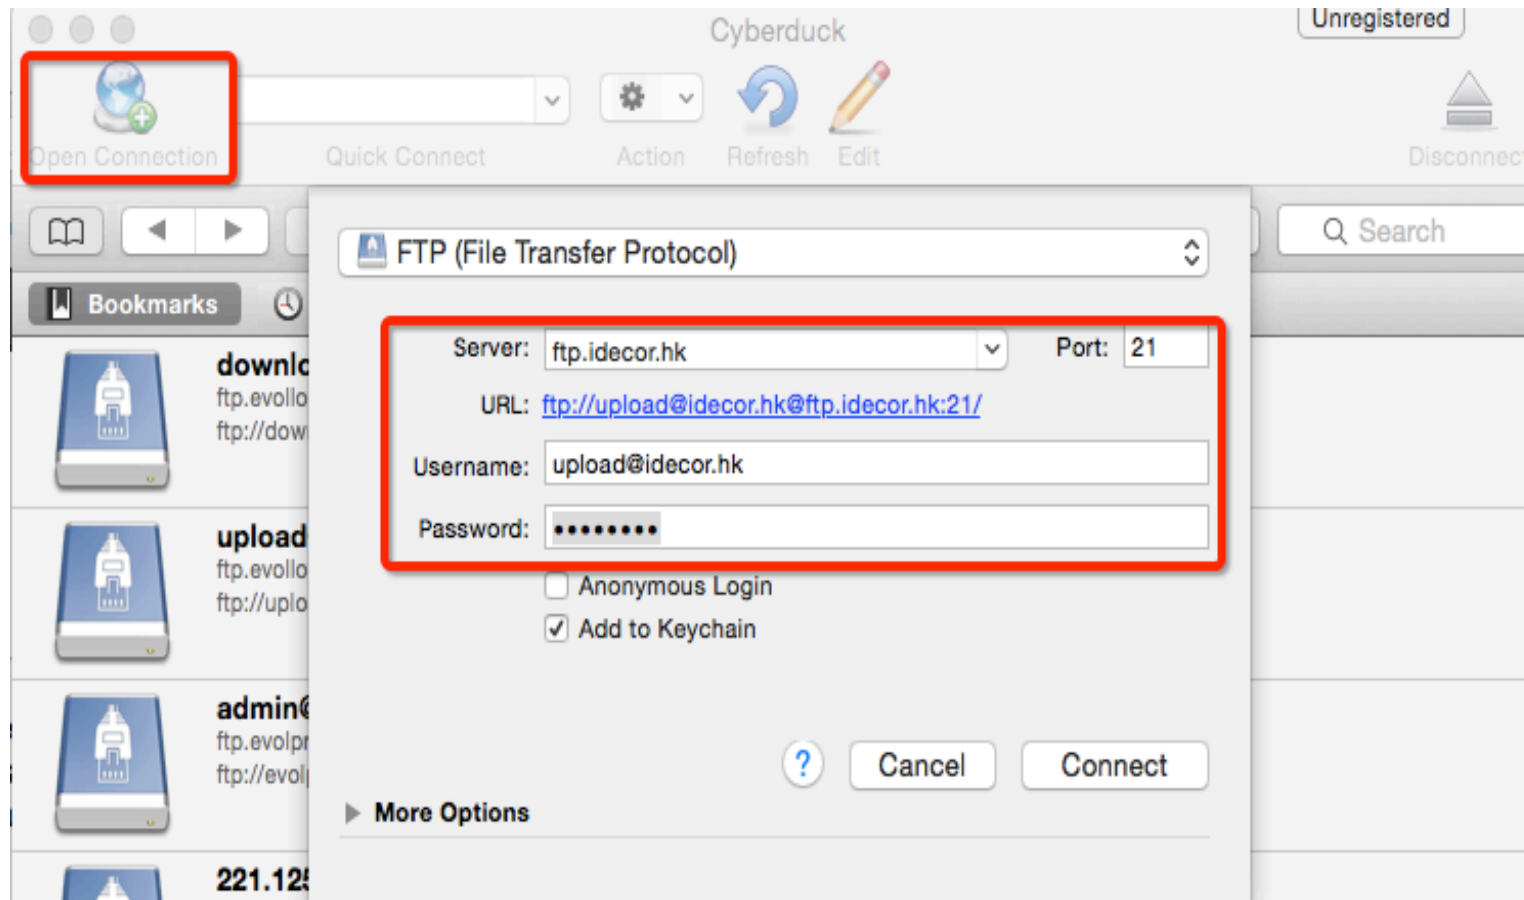

The screenshot shows the Cyberduck website in a web browser. The browser's address bar displays 'cyberduck.io'. A light blue banner at the top of the page states 'Version 4.4 now available for download and in the Mac App Store!'. Below this, there are links for 'Download on the Mac App Store', 'changelog', 'blog', 'development', 'help', and a green 'donate' button. A large yellow rubber duck is positioned on the left side of the page. To the right of the duck, the text 'Slow Mac? Make your Mac run faster with award-winning app.' is displayed, accompanied by 'Mac' and 'Universal' icons and a blue 'Download Now' button. The main heading 'Cyberduck' is followed by the subtitle 'Libre FTP, SFTP, WebDAV, S3 & OpenStack Swift browser for Mac and Windows.' At the bottom left, two download buttons are shown: 'Download Cyberduck-Installer-4.4.3.exe' (highlighted with a red box and a red arrow) and 'Download Cyberduck-4.4.3.zip'. On the bottom right, there is a preview of the Cyberduck application interface, showing a sidebar with bookmarks for 'Rackspace Cloudfiles', 'Amazon (HTTPS)', and 'Cyberduck', and a main pane displaying the contents of the Amazon S3 bucket.

2. Login with credential below after installation:

Server: <ftp.idecor.hk>

Username: upload@idecor.hk

Password: 31580761

3. Go into your existing folder "Reference No." (e.g. E140831FS)

4. Drag the photo folder to the
